The Melbourne Audiology and Speech Pathology clinic provides specialist intervention for individuals with acquired or progressive dysarthria.

Intervention is delivered by Master of Speech Pathology students from The University of Melbourne, under the supervision of a qualified and experienced Speech Pathologist.
**THIS INTERVENTION IS APPROPRIATE FOR:**
- Individuals with acquired dysarthria following a stroke
- Individuals with progressive dysarthria secondary to neurodegenerative disease (for example, Parkinson’s disease, Friedreich ataxia, multiple sclerosis, etc.)

**INTERVENTION STRUCTURE**
- Participants will attend clinic on a Monday or Wednesday.
- A full assessment will be conducted before starting therapy to identify goals for treatment.
- Therapy will include a weekly face to face session as well as a daily, computer based, home therapy program that will be uploaded onto the client’s laptop*.

*Individuals will require access to a laptop, or computer, in order to participate in the home therapy program.

**COST**
The total cost for the program is $200.
This includes:
- Full assessment
- Assessment report
- 4 weeks of intensive therapy (1 x weekly face to face session in the student clinic or via skype, plus a computer based home therapy program)
- Home therapy program software uploaded onto the client’s laptop
- After treatment assessment and report

---
