Supervisor Training and Education Program (STEP) 2016

THE CLINICAL SUPERVISION SKILLS TRAINING

AIMS TO:

• Provide strategies for clinicians to develop their teaching and supervision skills
• Support clinicians in developing effective and efficient education strategies and solutions based on their own experiences
• Collaborate with clinicians to design a clinical placement plan for learners
• Support educational leaders within health settings and across disciplines
• Acknowledge and address issues relating to diversity

The Foundational Program is designed to provide an overview of the fundamental elements of clinical supervision including:

• Facilitating learning in the clinical placement environment
• Providing effective assessment and feedback
• Evaluating clinical progress, problem identification and solution-focused placement strategies
• Establishing the supervisor relationship

The Intermediate Program is designed to focus on more advanced elements of clinical supervision including:

• Clinical supervision in a clinically diverse environment
• Formative and summative assessment
• Assisting learners to develop clinical reasoning skills
